

ADEKUNLE PRINCE

WEB DEVELOPER | I turn business ideas into working websites

Abuja, Nigeria | 0701 945 1544 | princeadekun01@gmail.com | prncedigital.com.ng

PROFILE

Web developer who helps businesses and organizations launch modern, responsive, professional websites — end to end. I handle the full journey from concept through design, development, deployment, and ongoing maintenance, so clients get a working, reliable website without juggling multiple contractors. My background as a Registered Nurse brings discipline, precision, and client-first care to how I plan, test, and deliver every project.

WHAT I BRING

- Full-stack capability: frontend (HTML, CSS, JavaScript) and backend (PHP, MySQL, WordPress) — one developer, fewer handoffs.
- End-to-end delivery: design, build, hosting, domain setup, and deployment handled personally, with maintenance available post-launch.
- Sector range: proven delivery for healthcare and education clients, where trust and usability matter most.
- Responsive by default: every site built mobile-first for Nigeria's mobile-majority web traffic.

EXPERIENCE

Web Developer — Independent Projects & Freelance Development 2025 – Present

Abuja, Nigeria

- Deliver responsive, professional websites for businesses and organizations, managing each project from client brief to live launch.
- Build fast, clean frontend interfaces in HTML, CSS, and JavaScript designed to convert visitors into leads and customers.
- Develop PHP-driven functionality and MySQL-backed features to support dynamic, data-driven websites.
- Customize and manage WordPress sites, giving clients an easy way to update content themselves after handover.
- Configure hosting, domains, cPanel, and deployment — clients get a fully live, working website, not just files.
- Diagnose and resolve technical issues quickly, keeping client websites fast, stable, and up to date.

SELECTED PROJECTS

Yepwi Hospital Website

Delivered a professional healthcare website designed to build patient trust from the first click — clear navigation, responsive layout, and organized information on services, departments, and doctors.

Stack: HTML, CSS, PHP, MySQL, WordPress, XAMPP

School Website — Winners Model School

Built a modern, responsive school website that presents academics, admissions, and news in a structured, easy-to-navigate way — helping the school make a strong first impression on prospective families.

Stack: HTML, CSS, JavaScript

Prince Digital — Personal Portfolio

Designed and built a personal portfolio site to showcase development skills, project work, and services — demonstrating the same standard of design and execution clients can expect.

Stack: HTML, CSS, JavaScript

EDUCATION & TRAINING

- Web Development — Practical Training: HTML & CSS, JavaScript, PHP, MySQL, WordPress, Responsive Web Design
- Registered Nurse (RN), Nigeria — 2023

CURRENTLY INVESTING IN

Advanced JavaScript · PHP & MySQL · Backend Development · Git & GitHub · Full-Stack Development — continually building deeper technical range to deliver more complete solutions for clients.

Ready to build your next website. Let's talk about your project.
